

**Description:** CristalACTiV™ G2 is a high surface area ultrafine TiO<sub>2</sub> powder with calcium sulfate suitable for use in Claus catalysis or applications requiring numerous active sites.

**Applications:** CristalACTiV™ G2 is recommended for evaluation in:

- Claus catalysis
- Water treatment

**Typical Properties:** This document does not constitute a specification. Product specifications are available upon request.

• Crystal form:	Anatase
• TiO <sub>2</sub> content (as is):	~76.5 wt%
• TiO <sub>2</sub> content (ignited base):	~89 wt%
• Surface area:	≥300 m <sup>2</sup> /g

**Regulatory Status:** CristalACTiV™ G2 has a wide range of regulatory approvals for various applications worldwide. Please see [www.tronox.com](http://www.tronox.com) or contact your Tronox sales representative for additional information. Regulatory information requests may also be submitted at [chemprodsteward@tronox.com](mailto:chemprodsteward@tronox.com).
